

# Neosun Energy Started the installation of a new Commercial Solar Station in Sheikhpura

Recently Neosun Energy has signed a deal with Trust Fiber LTD in Pakistan

October, 15 - Neosun Energy Pakistan started installation with the project of 367 kW Commercial Solar Station in Sheikhpura. Recently the company signed the contract with Trust Fiber LTD. The project, consisting of almost 600 Solar Panels (615Wp), will show 448 Mwh annual Generation.

"This Solar Station will reduce the Trust Fibre Unit-I Electricity Bill to Zero", - emphasized Junaid Kabir, the Head of Sales at Neosun Energy Pakistan and shared the first photos from the project site.

"The impact of this solar power plant will not only be on the overall country's Environment but will also help the business make profit and reduce the burden of it from consumers pocket. The most important factor behind an expensive product is the cost of energy consumed in making the product. But once solar comes into the fold the price of electricity is dealt with once in for all resulting in a cheaper product which makes it a win-win scenario for both manufacturer and consumer", - shared Junaid Kabir.

This year Neosun Energy has established branches in Karachi and Lahore, expanding its services for the region with the multiple completed projects. This move aims to provide commercial solar panels and energy storage solutions with capacities ranging from 200kW to 10MW for local commercial and industrial projects. In just a few months, the Neosun Pakistan team has already successfully completed multiple projects in the region.

“We expanded the market in Pakistan to support local businesses, providing them with innovative and affordable Solar Energy Solutions. We see immense potential in Pakistan not only in theory: our real projects here validate it.

Neosun Energy is entering this region with a wealth of international experience and standards that enable us to deliver high quality of service. Furthermore, Neosun’s extensive portfolio of projects worldwide allows us to offer competitive, low pricing. This scale of operations positions us to be very competitive in the local market, providing excellent value to the clients”, - emphasized CEO of Neosun Energy, Ilya Likhov.

### **About Neosun Energy**

[Neosun Energy](#) is an international Solar EPC company that provides Commercial Solar PV & Energy Storage Solutions (ESS) with capacity from 200kW to 10MW for Commercial and Industrial projects Worldwide. The company constructs solar power plants and energy storage systems (ESS) on a turn-key basis, covering all stages of construction including design, equipment supply, construction, and commissioning. The company has implemented solar PV projects in 16 countries worldwide.
