

NEOSUN Energy is solarizing 55 Reproductive Health Centers across Pakistan

December 16 - Pakistan. Neosun Energy is solarizing 55 Reproductive Health Centers in Pakistan. The company will bring off-grid solutions for Health Units of Marie Stopes Society in Lahore, Faisalabad, Multan and Peshawar.

Marie Stopes Society is one of the leading private sector service providers for family planning services in Pakistan. MSS presented more than 100 Health Units for providing consultations and helping people across the whole Pakistan.

Neosun Energy will install off-grid systems that will bring total independence of the grid, ensuring the smooth operation of the centers for all Pakistani families who need help and support.

“This project is a significant step towards our mission of advancing sustainable energy solutions that contribute to the betterment of communities, - commented Head of Neosun Pakistan Ehsan ur Rehman.

At Neosun Energy, we understand the importance of reliable and clean energy, especially in healthcare facilities serving underserved populations. By providing solar-powered solutions, we are not only supporting MSS's vital work in reproductive health and family planning but also helping to ensure uninterrupted access to essential services, even in remote areas”.

This collaboration underscores our commitment to improving the lives of people in Pakistan by enabling health services to operate efficiently, sustainably, and cost-effectively. We are proud to be a part of MSS's efforts to empower women and improve reproductive health in the country, and we look forward to contributing to their continued success in delivering high-quality, affordable family planning and reproductive health services.

“It marks the beginning of a meaningful relationship. We look forward to contributing to many more impactful projects together to achieve our goal of a healthier, more sustainable future for all Pakistanis”, - added Business Development Manager NEOSUN Pakistan, Osama Ahmed.

This year Neosun Energy has established branches in Karachi and Lahore, expanding its services for the region. This move aims to provide commercial solar panels and energy storage solutions with

capacities ranging from 200kW to 10MW for local commercial and industrial projects. In just a few months, the Neosun Pakistan team has already completed multiple big projects in the region, providing local businesses with solar solutions.

About Neosun Energy

[Neosun Energy](#) is an international Solar EPC company that provides Commercial Solar PV & Energy Storage Solutions (ESS) with capacity from 200kW to 10MW for Commercial and Industrial projects Worldwide. The company constructs solar power plants and energy storage systems (ESS) on a turn-key basis, covering all stages of construction including design, equipment supply, construction, and commissioning.
